Surwayne

IOT ANALYTICS
MARKET INSIGHTS FOR THE INTERNET OF THINGS

Your early-warning system for successful IoT-projects every time

IOT ANALYTICS
MARKET INSIGHTS FOR THE INTERNET OF THINGS

Surwayne is a project-monitoring software from Germany:
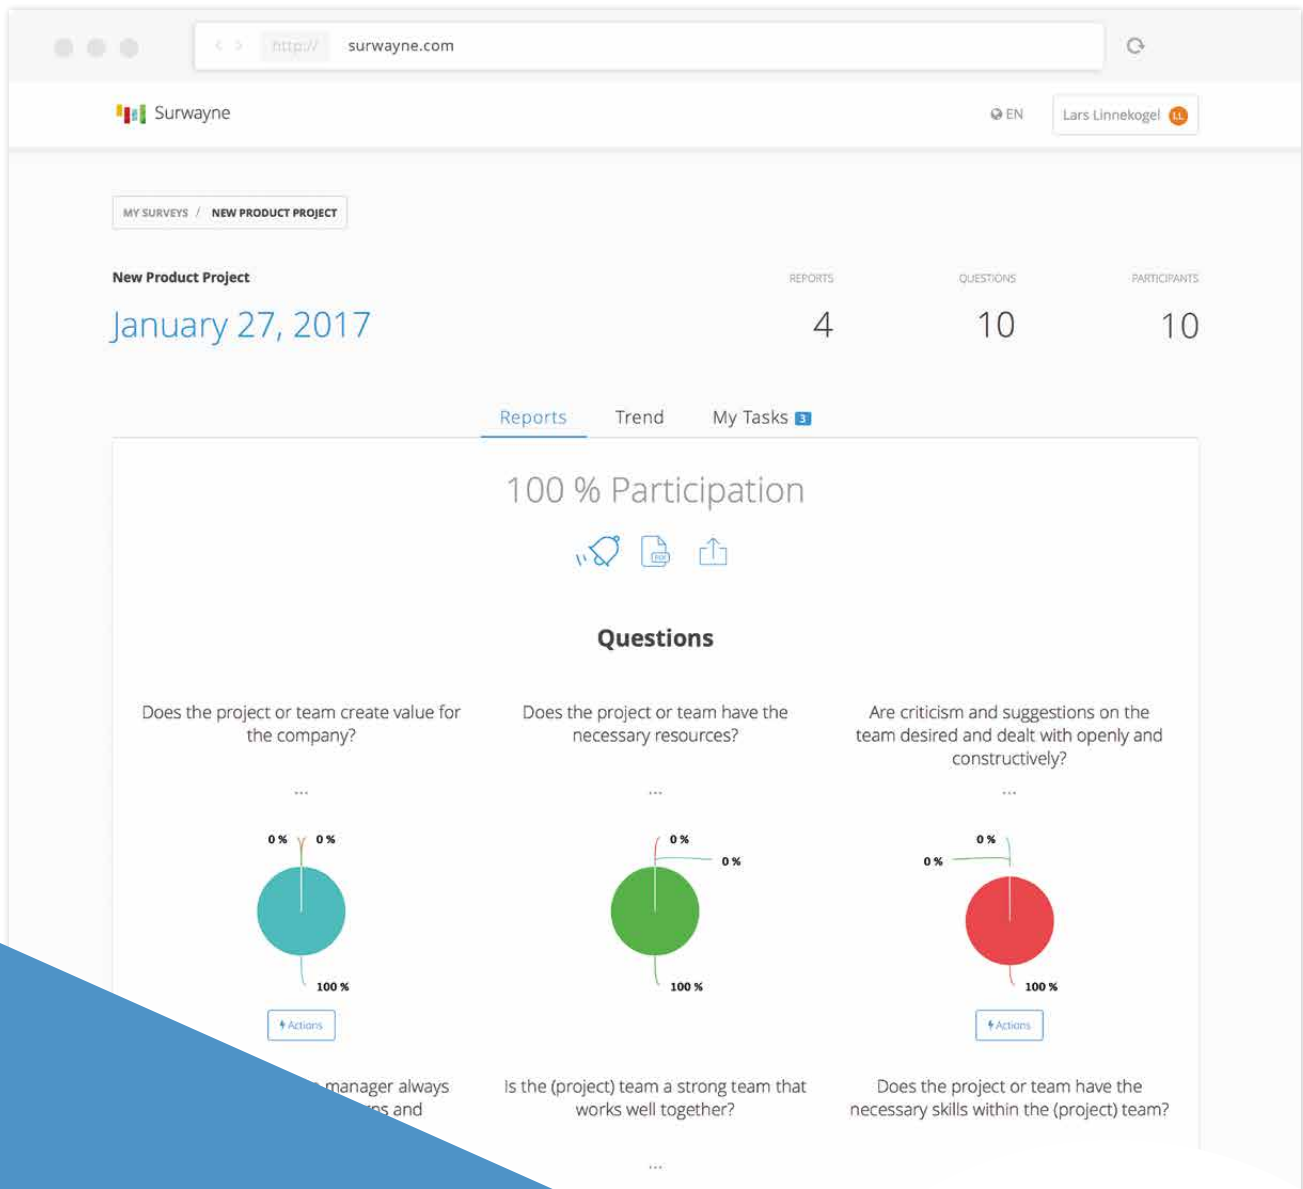

Project transparency by surveying project members online – not just once but automatically at regular intervals.

Detailed overview of strengths and weaknesses in all projects at the click of a mouse.

Surwayne suggests proven solutions and asks team members for ideas in response to problems.

Direct implementation of improvements thanks to the integrated task list.

No installation required – you can start right away.

Lufthansa Technik
More mobility for the world

"With Surwayne we're always up to date about what our team members think about our projects. It's not only extremely interesting, it works, too."

Daniel Hoffmann,
CEO, Lufthansa Technik Sofia

How you benefit from Surwayne

Greater project transparency

Overview of all your projects at a glance in the Surwayne dashboard

Repeat surveys of project members to determine the status of individual projects

Detailed project reports and analyses of strengths and weaknesses

Integrated task list for implementing improvement measures

More certain project success

Continuous project monitoring with automatic repeat online surveying of project members

Continuous overview of all projects using a simple traffic-light system

Immediate identification of weaknesses and ongoing progress monitoring throughout the course of the project

Weaknesses addressed through concrete solutions and integrated suggestion system

Less time required for project monitoring

All projects displayed at a glance in the dashboard using a traffic-light system – at any time and from anywhere on mobile devices

Playful smiley system for rapid project rating by project members

Brief surveys with 10 questions at most for quick responses and high participation levels

Integrated improvements and suggestion system for rapid troubleshooting

Lower total project costs

Less project-monitoring effort for management through automated surveys

Fewer wasted project resources through rapid identification of weaknesses and corrective measures

Improved tracking of the value added by external service providers

Ongoing success measurements possible even after project completion

Better staff loyalty and bonding

Project members are actively involved in project monitoring and reporting

Comprehensible usability using a fun smiley system

Structured method for revealing weaknesses and generating improvement suggestions

Greater motivation and productivity through focus on value-adding activities

Your project delivery up to 35% faster with Surwayne

Surwayne is both simple and fun

1. Ten questions at most

2. Intuitive surveys at regular intervals (e.g. every 14 days)

3. The dashboard indicates which projects are red or green

4. Measures available to deal with any weaknesses - or can be automatically requested from participants

5. Personalized action plan / task list for tracking

6. Trend reports reveal how projects are continuously improving
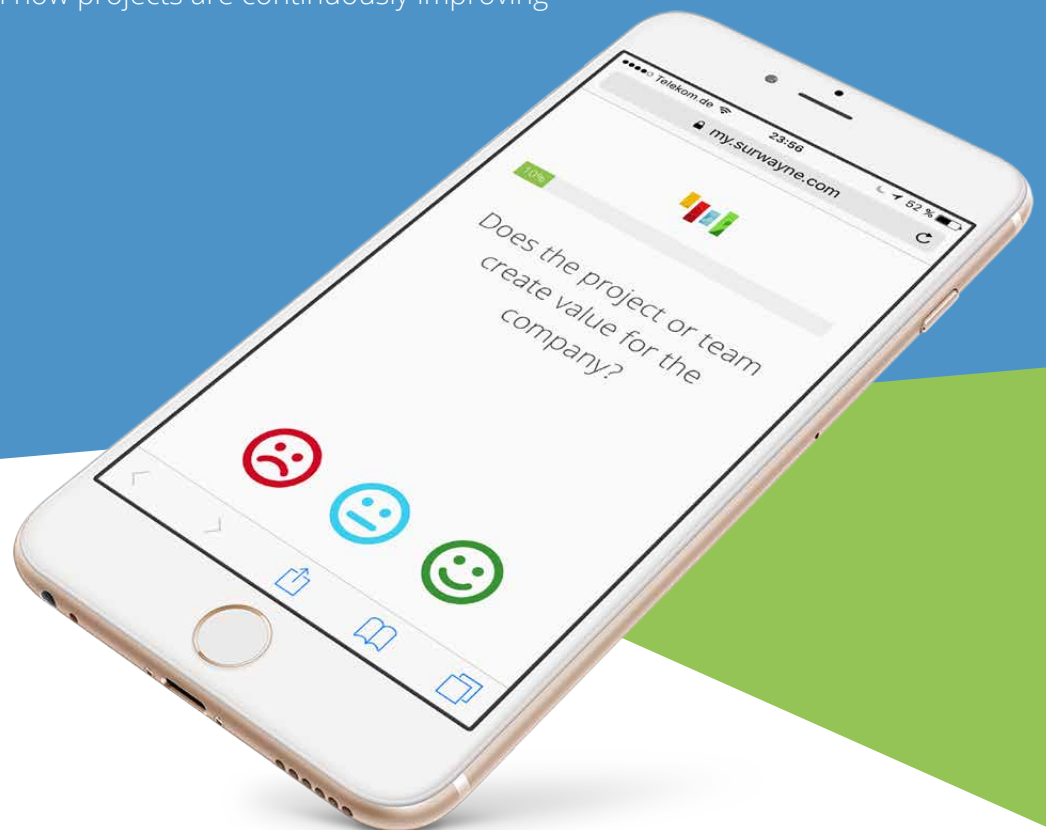

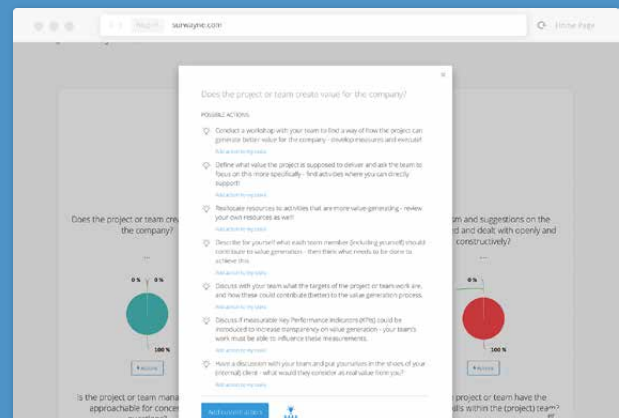

Five functions for advancing your projects
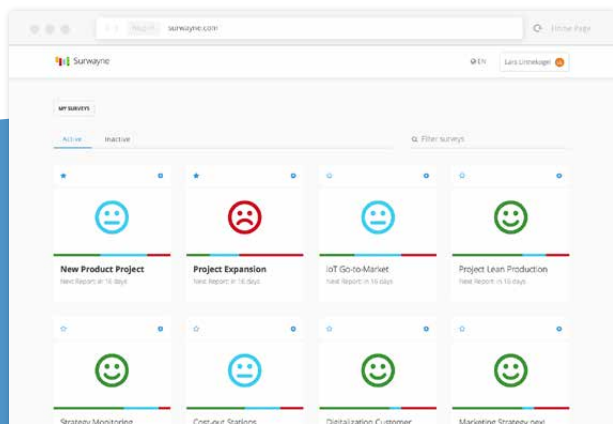

**The dashboard:** All projects fully transparent – at a glance, at any time
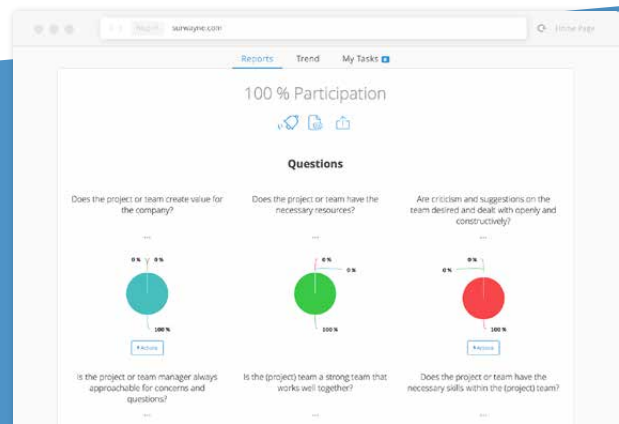

The reports: Details of strengths and weaknesses for each project

The trend: Simple progress analysis for lasting results

The action plans: Problems rapidly addressed with proven suggestions or automated procurement of ideas from project members

The task list: Reliable implementation of suggested improvements through automated task-list tracking

Your projects are in safe hands with us

- Your data hosted exclusively at locations in Germany

The idea

The strongest feedback you can get is the honest views that your employees share with you. All the better when they're also coming up with great ideas about what to do.

And that's what Surwayne is all about!

Lars Linnekogel, CEO.
The CEO at The Team Enablers GmbH consulting firm is an expert in project and team management. He worked as project leader at The Boston Consulting Group (BCG) where he was responsible for managing international project teams until 2015.

Artur Heinze, CTO,
is an experienced project and software developer. He's been heading the Agente-jo project agency for more than 12 years now and has launched several of his own Internet start-ups in addition to his work on many client projects, including projects for Airbus and Hapag-Lloyd.

We're looking forward to receiving your inquiry.
